

Dear Children,

I am an astronaut and I need your help.

I am due to go into space on a special mission. My mission is to look for friendly aliens in space. The problem I'm having is that nobody has ever seen an alien, so I don't know what they will look like.

Do you know what an alien looks like? Would they have lots of arms or lots of heads? Do you think they might have one eye or 3 legs?

Please can you help me by designing your own alien and recording how many body parts you think it would have?

Please send me your ideas and then I will know what I am looking for.

From

Alison the Astronaut
