

We are learning to make number bonds to 10.

Can you colour each of the Numicon snail's shell to make the number 10 in different ways? Make sure to write the number sentence too. The first one has been done for you...

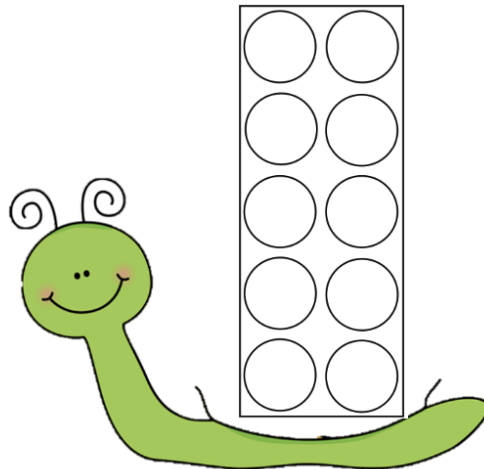

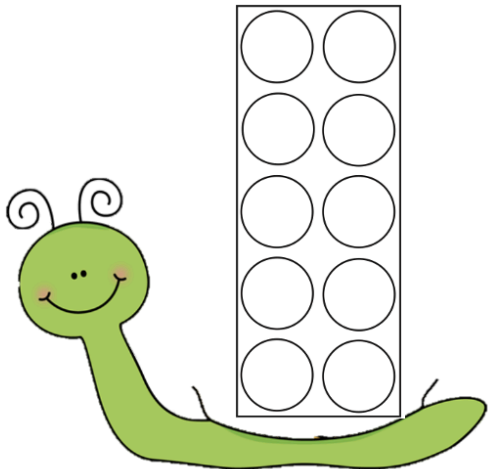

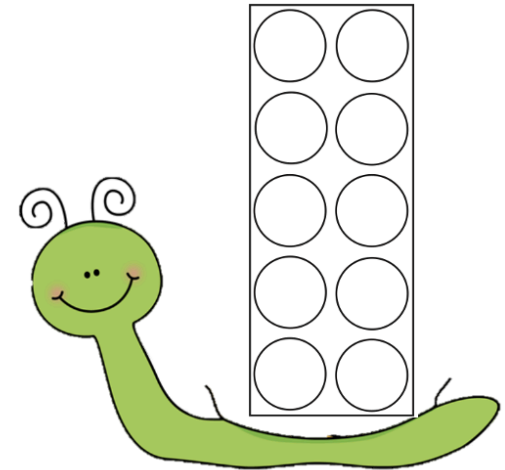

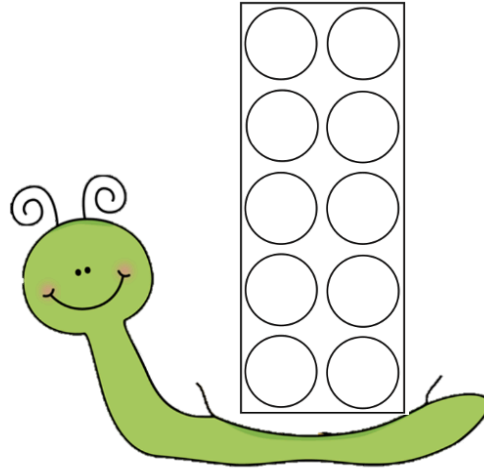

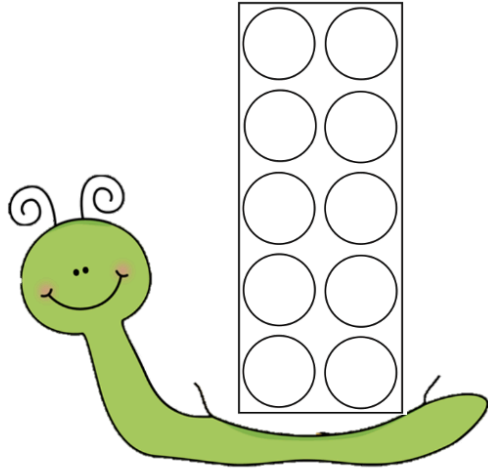

$$1 + 9 = 10$$

Remember to include the reverse ones as well (e.g. $1 + 9 = 10$ and $9 + 1 = 10$)
